**This message may be from an external email source.**

Do not select links or open attachments unless verified. Report all suspicious emails to Minnesota IT Services Security Operations Center.

Dear Ms. Spuckler,

The Technical Advisory Group formed to review the potential adoption of ASHRAE 90.1-2019 by the state of Minnesota recommended a modification (line item 12) to ASHRAE 90.1 section 6.5.6.1.2. This modification would remove the requirement for exhaust energy recovery when the outdoor airflow rate is under 20%.

As someone who works for a mechanical contractor that designs and installs HVAC equipment in multifamily buildings, I recommend this modification be applied to section 6.5.6.1.1 for *Nontransient Dwelling Units*. Adding energy recovery

equipment to every dwelling unit will increase construction cost substantially. Inevitably this cost is then passed on to the tenant.

I respectfully request a public hearing regarding the adoption of ASHRAE Standard 90.1-2019 *Energy Standard for Building Except Low-Rise Residential Buildings* as it specifically pertains to the aforementioned section.

Sincerely,

Chad Hanson

**Subject:** RE: ASHRAE 90.1 Code Changes

Dear Mr. Koetter,

As a part of your hearing request, you must identify the portion of the rules that you object to or state that you oppose the entire set of rules. It is helpful if you explain the reason for the request and any changes you want made to the proposed rules so that the Department can prepare a response if there is a hearing on the matter.

Thank you.

**To:** 'dli.rules@state.mn.us' <dli.rules@state.mn.us>  
**Subject:** Proposed Permanent Rules to Amend Minnesota Rules, Chapter 1323, "Commercial Energy Code"

Dear Ms. Spuckler,

The Technical Advisory Group formed to review the potential adoption of ASHRAE 90.1-2019 by the state of Minnesota recommended a modification (line item 12) to ASHRAE 90.1 section 6.5.6.1.2. This modification would remove the requirement for exhaust energy recovery when the outdoor airflow rate is under 20%.

As someone who works for a mechanical contractor that designs and installs HVAC systems in multifamily buildings, I recommend this modification be applied to section 6.5.6.1.1 for *Nontransient Dwelling Units*. Adding energy recovery equipment to every dwelling unit will increase construction cost substantially. Inevitably this cost is then passed on to the tenant.

I respectfully request a public hearing regarding the adoption of ASHRAE Standard 90.1-2019 *Energy Standard for Building Except Low-Rise Residential Buildings* as it specifically pertains to the aforementioned section.

Sincerely,

### **Cassidy Rothfork**
