Notice of determination of truck rental rates and notice of informal conference (Minnesota Rules, part 5200.1105)

On Nov. 27, 2023, the Department of Labor and Industry (DLI) commissioner determined the minimum truck rental rates for state-funded highway projects.

The truck rental rate is determined for each equipment type by adding the average hourly cost of operating the vehicle to the certified prevailing-wage rate for the driver. The average hourly operating costs are determined by voluntary survey of truck owner operators, trucking contractors and trucking firms. Cost data used in DLI's analysis must be representative of five trucking firms of various size and five independent truck owner operators for each type of truck.

This year, there was insufficient cost data submitted to DLI to determine a new hourly average cost of operating a truck. Therefore, last year's average operational cost has been carried forward and combined with this year's certified prevailing-wage rate for a driver to establish the minimum truck rental rate.

The determination of the minimum truck rental rates by region are as follows.
